

INSIGNIA

An impression of thoughts and emotions

2020-21

सरस्वती नमस्तुभ्यं, वरदे कामरूपिणी ।
विद्यारम्भं करिष्यामि, सिद्धिर्भवतु मे सदा ॥

Our Mission

"Personality Development for Nation Building"

Our Vision

"India is on its growth path of developing through different industries and agriculture." World is becoming smaller and globalization has come to stay. In this process of inevitable changes in the world, there is need to prepare value driven global citizens and technically competent socially conscious people for building India.

In S.M.Shetty Educational Institutions we will prepare the critical mass of human resources for preparing "New India". We will continually provide the environment and facilitate students to discover and develop their potential. This will be done through unique learning centres, which will become the benchmark for academic institutions globally.

Our Core Values

- Continuous growth of our students through continuous growth of teachers.
- Facilitate discovery.
- Making ordinary students extra-ordinary.
- Innovate.

FROM THE EDITOR'S DESK

“Education gives you wings to fly”

-Dr. A.P.J. Abdul Kalam

The Junior College Magazine 'Insignia' – an impression of thoughts and emotions...espouses the creativity of thoughts, imagination and spirit of our students which is built up within the premises through the collective actions and aspirations.

This is a time of great changes. In education too we see swift changes. The student today is an individual, is a real person with feelings of self-respect, sensitivity, responsibility and compassion. We recognize, appreciate, applaud and foster the fine blend of sensibilities in the students – and thus this edition of Insignia is to be viewed as a launch pad for the student's creative urges to blossom naturally and create a world of beauty in words.

The magazine is beaming with enthusiasm and new creative ideas. The Editorial Board has proven its worth by giving the magazine a fresh, entirely different, new and grand look. The cover page reflects the humble initiative of Bunts Sangha's S.M.Shetty High School and Junior college which is committed to maintain high standard of integrity with a sublime mission of giving wings to the dreams of our students!

We express heartfelt gratitude to the members of the editorial team who have striven hard to incorporate within the magazine's pages long-term goals of the College, and to inspire and educate the readers about issues and ideas that matter to them, ones that are playing out in the world and on campus by their continuous involvement in shaping and developing the publication with immense toil and perseverance.

Let us all make the fullest use of our potentials to make our institution shine in and out of the country for the betterment of our own lives.

Happy Reading...!

President's Message

Chandrahas K Shetty

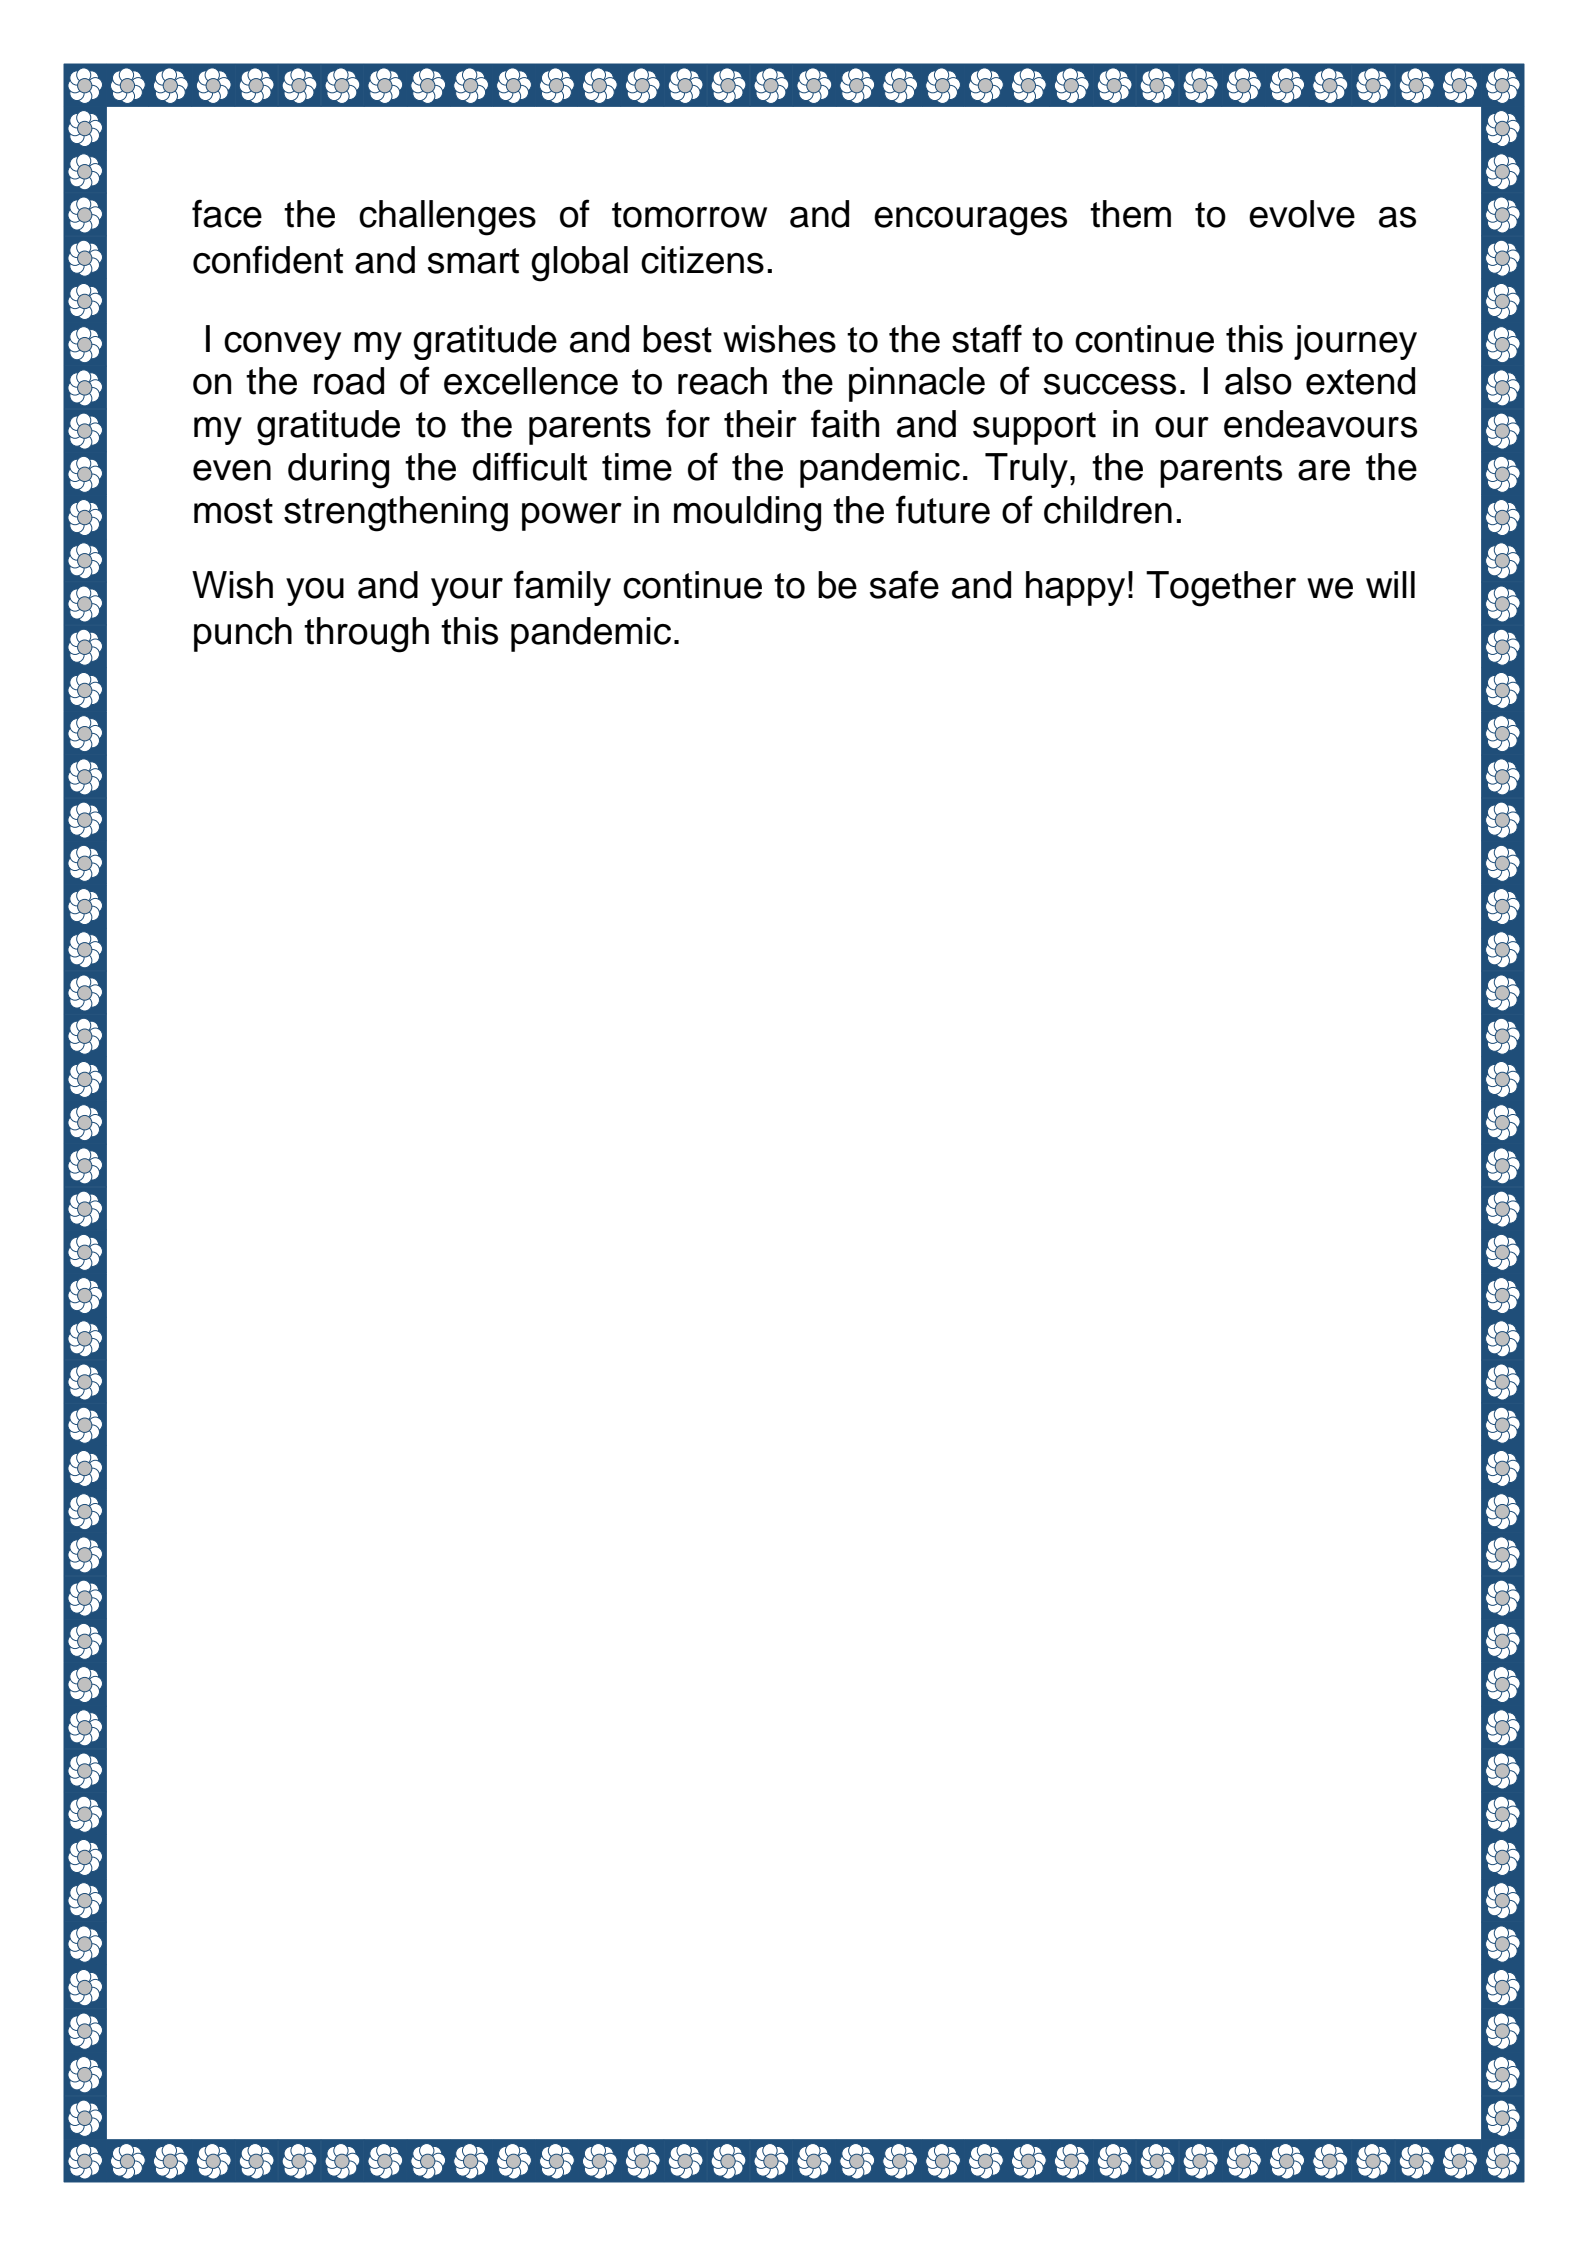

President – Bunts Sangha, Mumbai

Greetings to all the stakeholders!

In these uncertain times of the pandemic where the whole of the World is still facing restrictions, I wish you and your family to keep safe and well! We have always tried to make our educational institutions as centres of academic excellence with the co-operation of our fully committed, faithful, sincere, and dedicated staff members. The office Bearers of Powai Education Committee, Principals, teaching, and non-teaching staff members have undertaken a lot of systematic and time bound measures in ensuring continuous learning environment is made available to our students. Our institutions have devised their online learning strategies using various tools and technologies to enable learners to become digitally connected.

A famous philosopher once said, 'Inside all of us is a hidden dream.'

Our E-magazine serves as a platform that extends bountiful opportunities for our young talents to showcase their creative abilities, hidden dreams, and aspirations for writing. Their imagination is the key to building a great future for our country. Today, the role of an educational institution is not only to pursue academic excellence but also to motivate and empower the students to be lifelong learners. We inculcate values and equip them with the necessary skills that help them to compete globally and attain excellence in their lives and career to achieve the institutional vision '**Personality Development for Nation Building**'. Although academic excellence is our major goal, we emphasize on grooming the students to

face the challenges of tomorrow and encourages them to evolve as confident and smart global citizens.

I convey my gratitude and best wishes to the staff to continue this journey on the road of excellence to reach the pinnacle of success. I also extend my gratitude to the parents for their faith and support in our endeavours even during the difficult time of the pandemic. Truly, the parents are the most strengthening power in moulding the future of children.

Wish you and your family continue to be safe and happy! Together we will punch through this pandemic.

Chairman's Message

B R Shetty

Chairman – Powai Education Committee

“No matter how much falls on us, we keep plowing ahead. That’s the only way to keep the roads clear.”

-Greg Kincaid

A virus brought this whole world to a standstill; yet we move ahead, yet we endure. And most importantly, we still learn – teachers and students alike. This virus and the following lockdown showed us a situation never seen before in our lifetime. It put before us challenges no one ever imagined. So, with the help of technological innovations we opt for a solution never thought possible before – **Online Learning**.

Teaching and learning, functions & events, exams and assessments everything happened online. Through a digital screen we communicated, we assimilated, we absorbed and we grew together. The circumstances were unknown and challenging for teachers, students and parents were all alike but with strong resolution and zealous co-operation from all the stakeholders we came through and enjoyed a good year of online learning.

For a successful year of online education, an efficient management and a stable medium of communication was the key. Bearing this in mind, Bunts Sangha's S M Shetty Educational Institutions came up with a disciplined

system and joined hands with software giants like Microsoft and Google. Classes with activities were held online with the help of Microsoft Teams, Google Meet and Zoom. Students interacted with teachers through these media and for further doubts teachers were always available on phone. Furthermore, annual events like Sports Day, Annual Day, and other cultural events were organized online as well. Hundreds of webinars took place across sections for various verticals of the organization. An academic year is incomplete without these events – for they help students to grow and boost up their spirits. Other activities and presentations were also put together to keep students' morale high and going throughout the year.

Dear readers,

The future demands innovation – for growth is incomplete without new ideas and new ways of doing old things. The world is evolving and adapting to new innovations, hence, we also keep up with the pace of the world and adapt to the new innovations and advancements in technology. Still, the core focus is always on education and helping students learn and grow.

As the Chairman of Powai Education Committee managing Bunts Sangha's S M Shetty Educational Institutions, I feel proud of the fact that the education was never under lockdown in spite of stricter restrictions implemented all over the world. I acknowledge and appreciate the untiring efforts made by teachers and non-teaching staff to not only pass the phase but graduate it with merit throughout the period. And the journey is still on.

From this platform of the annual magazine, I wish to compliment the parents for their constant support in our joint endeavour of making education happen. While we understand the ongoing time is still difficult, there is always a ray of hope shining upon the universe. We wish to have your support to not only continue but also to have it multiplied for the future of our children. Your support and cooperation boosts our morale to tackle the challenges with greater energy and enthusiasm. Let us keep up this good work and continue to co-operate through these unprecedented times and see that our children don't miss out on their education and younger days of growth and learning. I am confident that we will cater to a future of bright ideas and crisp innovations. Keep plowing ahead.

All the Best and Stay safe.

Secretary's Message

CS Uttam Shetty

Secretary- Powai Education Committee

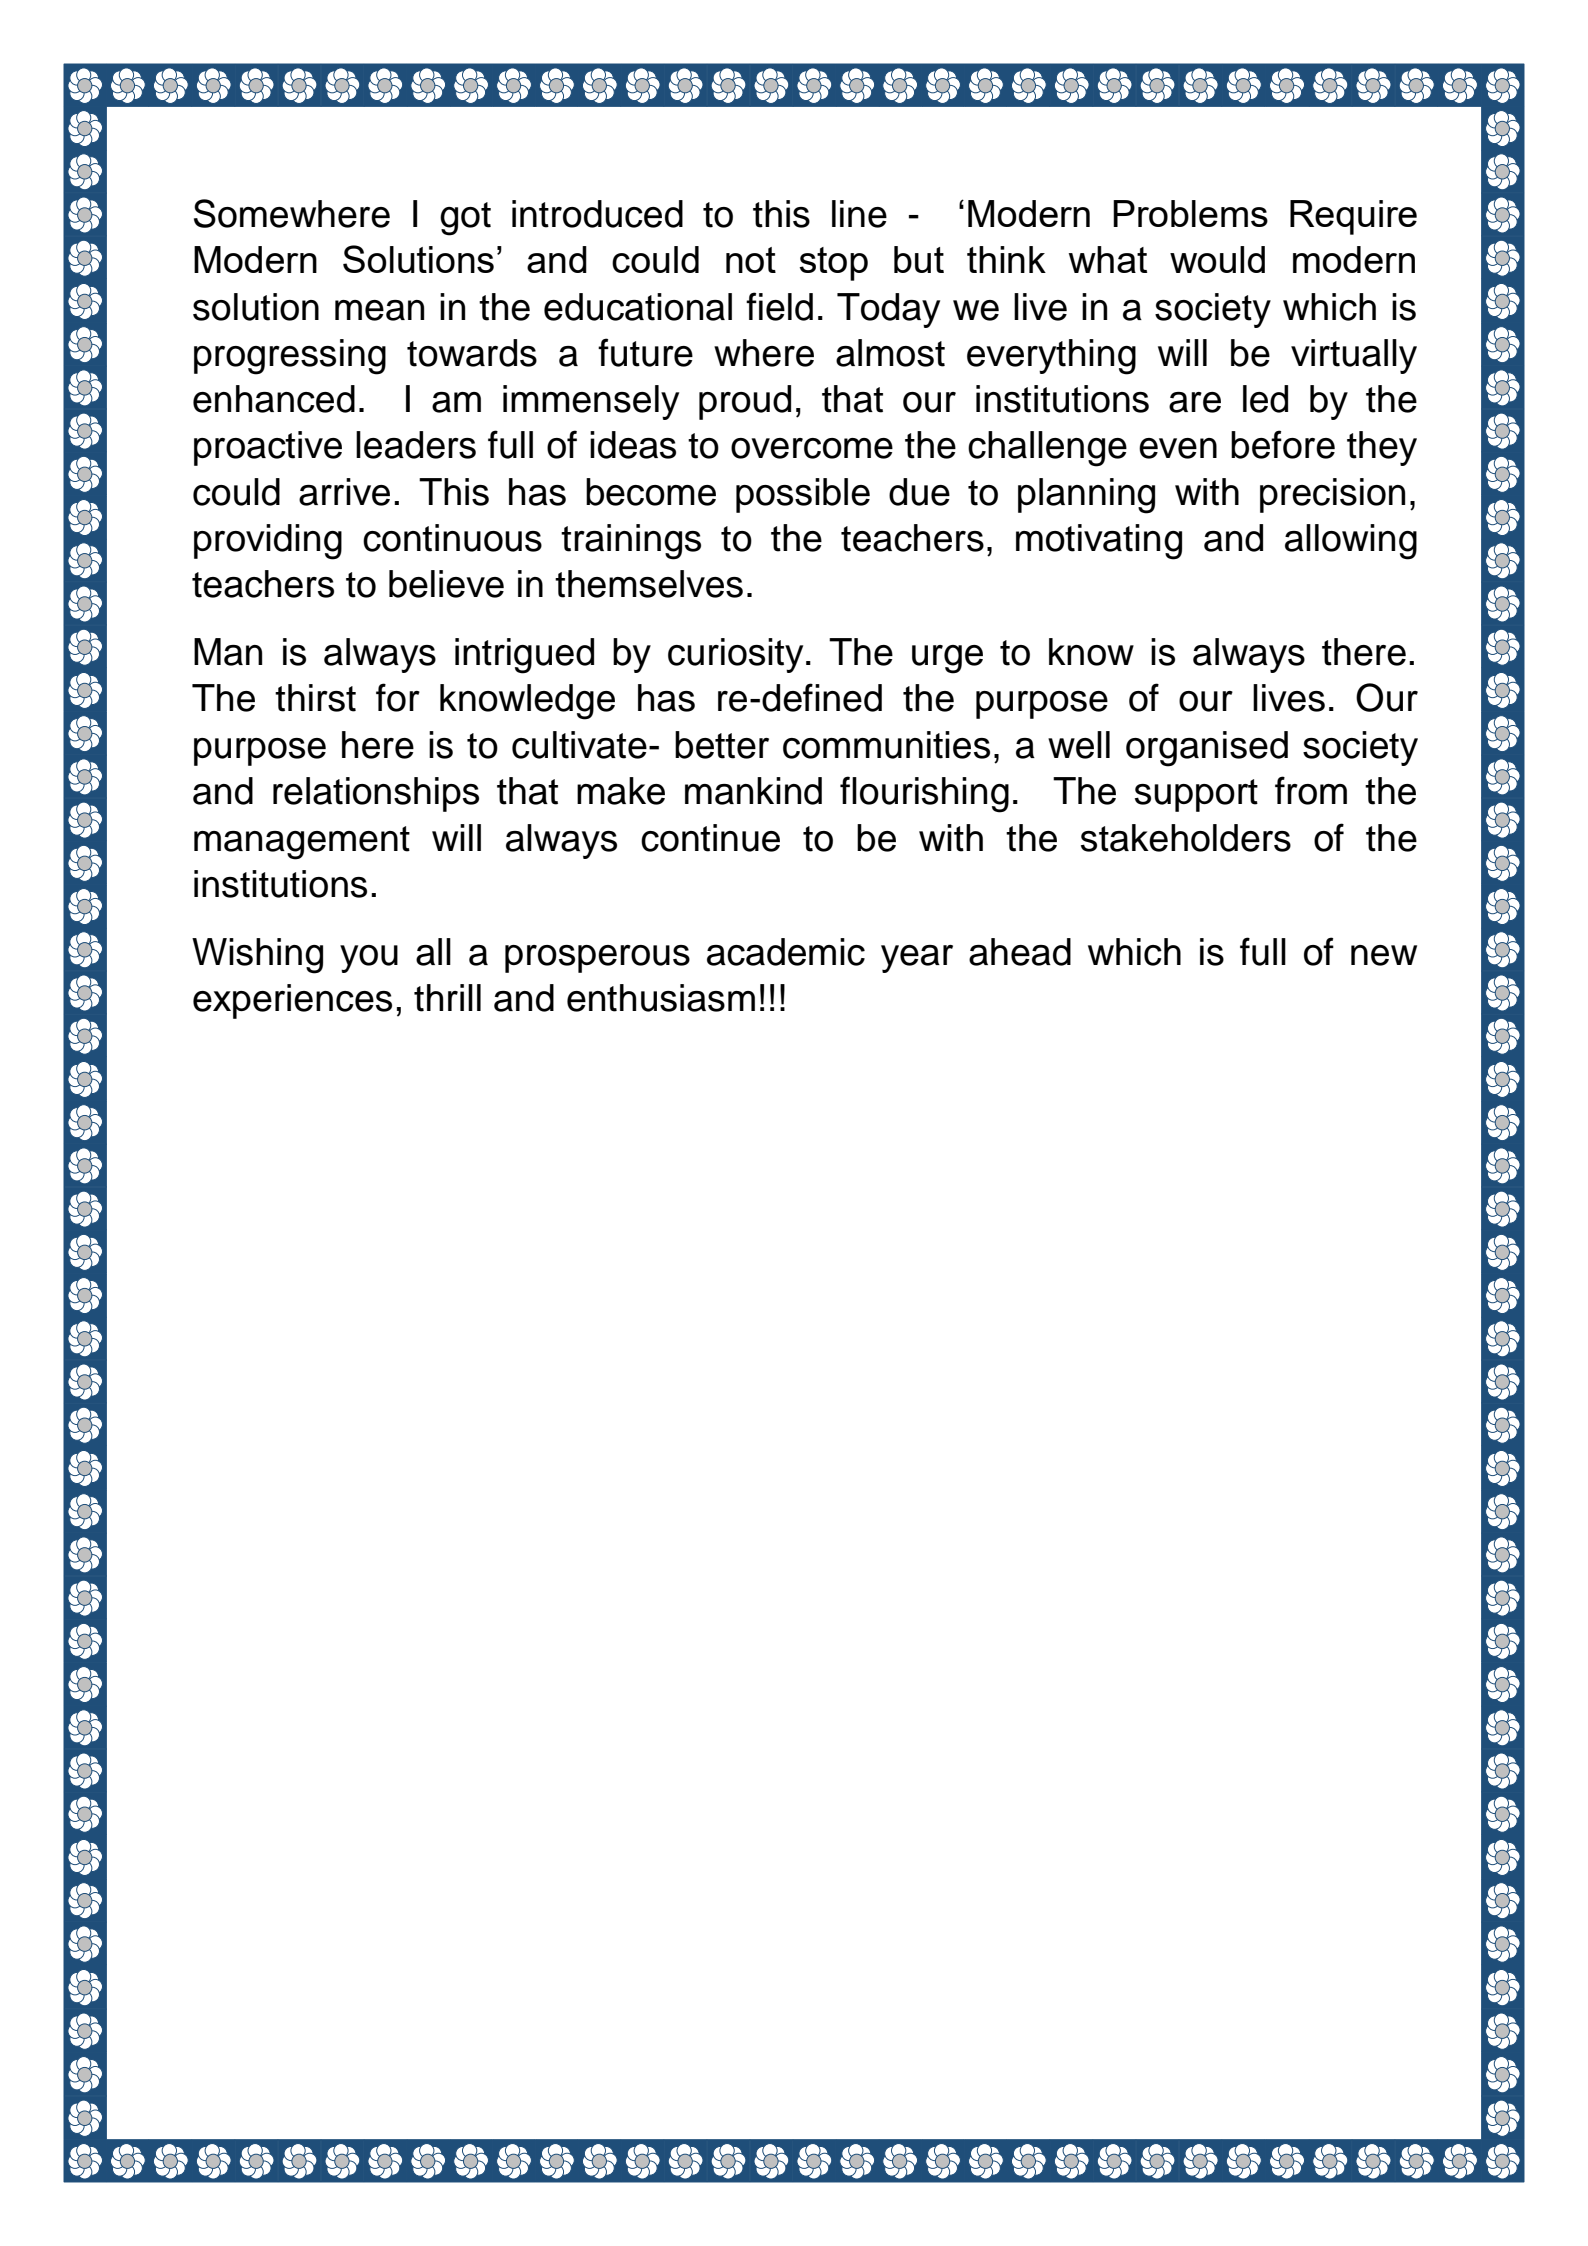

'Education- the key to unlock the golden door to freedom.'

Education certainly grants us huge scope. It makes us strong and disciplined, bold and impressive, poised and optimistic. It kindles in us ambitions and hunger to transcend. A desire to see ourselves on the top is fulfilled with education. We never suffice our dreams as we never let ourselves stop dreaming. Education certainly helps achieve all that we have dreamt about.

"When you really desire for something from the heart and soul, the entire universe conspires in helping you achieve it."

- Paulo Coelho

The year 2020-21 had been a year of new experiences, of trials and errors, of innovations and inventions more than that of fun and anxiety. This year allowed all of us prove our efficiency in different dimensions, we could show our abilities in technological field and hidden talents were explored. The Bunts Sangha's S M Shetty Educational Institutions have lived up to the expectations once again. This was a year of showing to the world that no matter what, this institution is unstoppable. All our institutions have always made us proud with the bench mark they have set each time.

Somewhere I got introduced to this line - 'Modern Problems Require Modern Solutions' and could not stop but think what would modern solution mean in the educational field. Today we live in a society which is progressing towards a future where almost everything will be virtually enhanced. I am immensely proud, that our institutions are led by the proactive leaders full of ideas to overcome the challenge even before they could arrive. This has become possible due to planning with precision, providing continuous trainings to the teachers, motivating and allowing teachers to believe in themselves.

Man is always intrigued by curiosity. The urge to know is always there. The thirst for knowledge has re-defined the purpose of our lives. Our purpose here is to cultivate- better communities, a well organised society and relationships that make mankind flourishing. The support from the management will always continue to be with the stakeholders of the institutions.

Wishing you all a prosperous academic year ahead which is full of new experiences, thrill and enthusiasm!!!

“It is not the strongest of the species that survives, nor the most intelligent that survives. It is the one that is most adaptable to change,”

**-Charles Darwin British
Naturalist**

COVID-19 has brought about a whole set of challenges in every possible realm and the field of education is no exception to this. The crisis is accompanied with radical changes and uncertainties with no sure timeline to end. But our experience and wisdom guide us that we have to embrace the change as there is no escape route to this crisis. Therefore, the practical mantra is when we cannot change the situation better change ourselves to the situation for our survival, growth and excellence. The crux of the matter is we have to change our perceptions, thought process, feelings or emotions, action tendencies and finally actions or behavior.

Education is not only a tool of acquiring information and degrees but extensively stretching beyond it. It is the training of body, mind and soul together. Schools and colleges are the places wherein the mental, intellectual, emotional, social and cultural traits of crores and crores of students will be unleashed, nurtured and groomed. In the last one year students were deprived of the significant part of educational outcome. Online teaching and other education related activities are not a perfect substitute to classroom teaching. Any education without a human touch is incomplete and side effects and potential hazards of such a model are huge.

However, policymakers, institutions and for that matter all stakeholders of education system have shown resilience and demonstrated agility to take the students' causes to certain level of logical end. Navigating students and parents through anxiety and stress is really an uphill task. But we have navigated our students through timely and appropriate actions. The teaching fraternity has instilled hope and confidence in every student.

I thank our benevolent and considerate Management, Vice-Principals, Coordinators, Teaching fraternity, Non-teaching staff and Students and Parents to work as a cohesive team during the turbulent times. We strive hard to create a path of hope and confidence to our students.

**“Never let a good crisis go to waste”
-Winston Churchill**

Vice-Principal's Message

Ms. Pratibha Gadagalli -- Principal

“The task of the modern educator is not to cut down jungles, but to irrigate deserts.”

- C.S. Lewis

It is of greatest relevance to bestow holistic education to the future citizens of our nation. Academic excellence along with co-curricular and extra-curricular activities completes the process of education. Bunts Sangha's S.M. Shetty High School and Junior College, therefore, lay significant emphasis on both co-curricular and extra-curricular activities providing students an edge over others in their various enterprises.

I am extremely delighted for our Junior college has completed 17 successful years. It is my pleasure to be a part of this institution, as I am closely associated with it from the inception of Junior college, so my bonding towards the college is growing with the number of years this institution is completing. We started Junior college in the year 2003 with a meagre number of 156 students and after a decade, today, we have reached a benchmark of 1694 students, one noticeable thing I would like to share is that we have grown more than 10 times in 17 years. And we as an institution are proud to proclaim that our students are scattered all around the world pursuing their higher education and who are into the fields of engineering, medicine, Information technology, Banking and Finance, Journalism, etc...., for this success I give credit to our management for their immense amount of support, Principals of various sections and teachers.

The college magazine “Insignia” aims to capture and represents diverse facets of Bunts Sangha’s S.M. Shetty High School and Junior College. The magazine is also a true impression of all the varied achievements and progress made by the college in accomplishing the coveted goal of yielding disciplined and quality education. It is also a platform for the students to express their creative pursuit which flourishes in them originality and innovation and reflect the magnificent brilliance of thought and imagination of our students. It showcases the diversity of thoughts, creativity etc., of the budding souls of our college and intends to fill the young minds to unleash their unparalleled potential. I extend my heartfelt gratitude to the management, teachers, parents and students for their whole hearted support and cooperation.

“Things do not grow better. They remain as they are; and we grow better by the changes we make in them”- Swami Vivekananda

Coordinator's View

*Ms. Preethi Warior
Science Coordinator*

A Sanskrit shloka that emphasize the importance of an educated person,

“Swagruhe poojyate pithara:

Swagraame poojyate prabhu:

Swadeshe poojyate raja,

Vidwaan sarvatra poojyate”

[Parents are respected in their own house, a landlord or a rich man is respected in his village, a king is respected in his country, but a scholar is respected and adored everywhere]

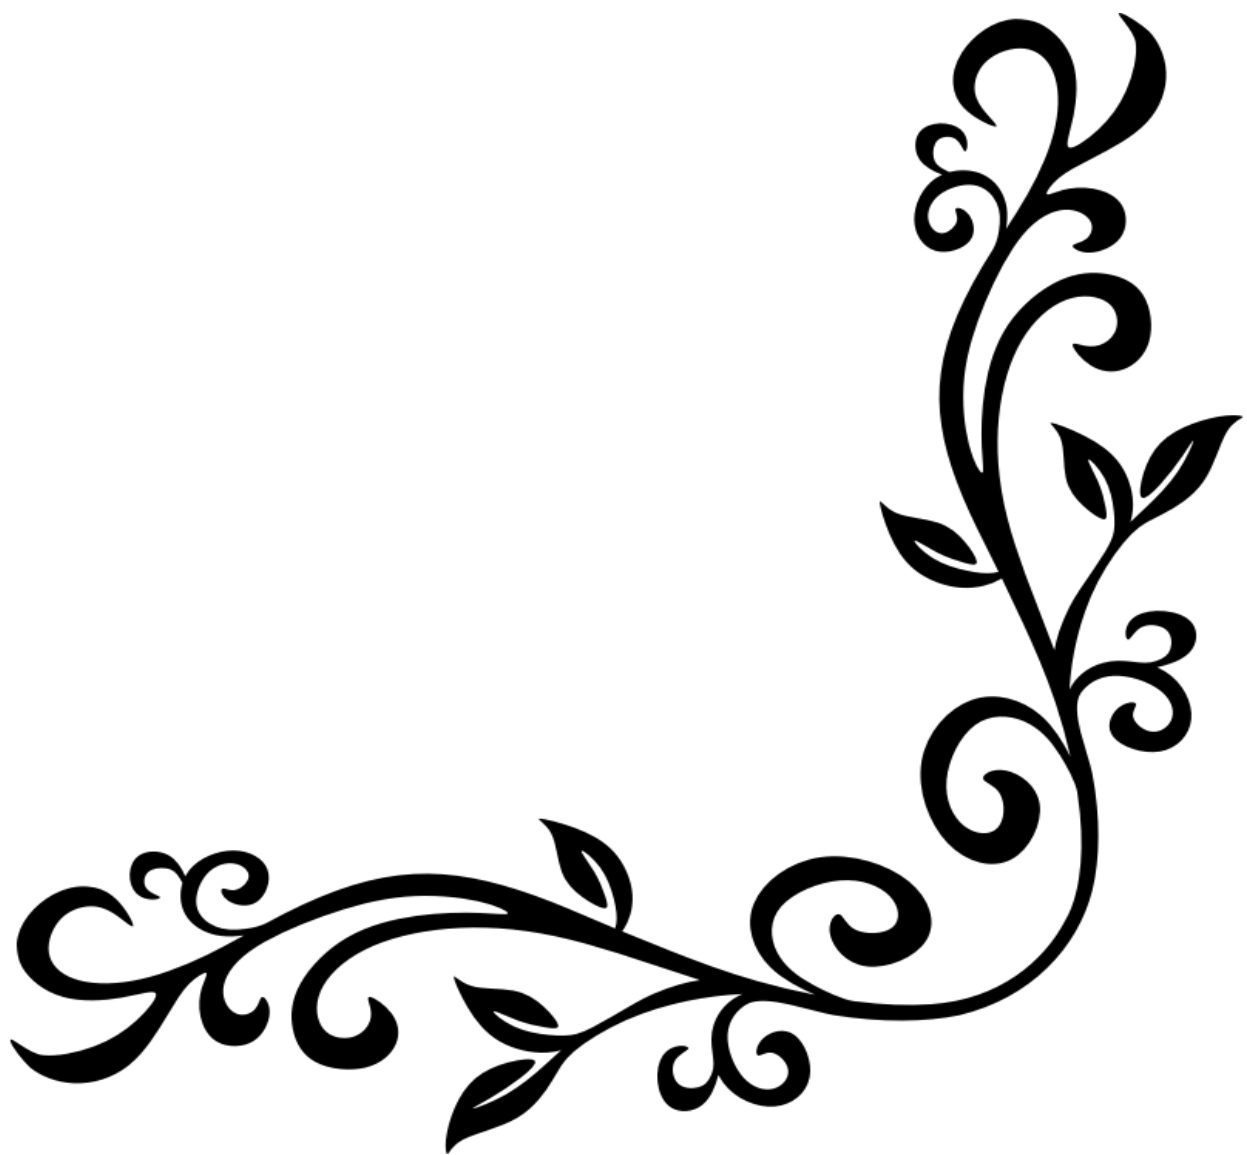

In this context, a well-educated and proficient person is valued for his knowledge. All round development of children is the main objective of Education. I believe along with subject knowledge, students must be familiar with other fundamentals like yoga, importance of health, fitness and above all the mind-power to handle the trying situations.

One academic year has passed where we only interacted through online means. But just one assurance, you are associated with one of the most prestigious institutions that is committed to quality education complimented with a group of experienced teaching and non-teaching faculty and a management with great vision.

As we are going through tough times in the fight against covid-19 pandemic, life has taught us the importance of our health, freedom of movement and the need to sustain in worse situations.

Covid-19 has brought new dimensions to learning process. All over the world, teachers have put in their hard-work to ensure that students don't miss the continuity of learning.

My best wishes to you students. Equip yourself with vast knowledge, determination, confidence, empathy and enthusiasm to create a civilized society and thereby leading India to a developed nation

Ms. Uma Nair
Commerce Coordinator

"Learning gives creativity, Creativity leads to thinking. Thinking provides knowledge, knowledge makes you great." Dr. APJ Abdul Kalam.

It's been a decade that I have been a part of S M Shetty Educational Institutions.

S M Shetty Junior college strives to inculcate strong values in the students' life. We constantly put our efforts to empower our students' creativity. Our faculty is always ready to assist and guide our students with a positive attitude.

During this pandemic situation, we transformed from on campus teaching to an online teaching catering to learner's interest. In order to realize students' true potential we conducted various Co-curricular and extracurricular activities virtually.

We constantly inspire and motivate students to become a responsible and accountable citizens towards the society.

I also take this opportunity to thank our management and the parents for having bestowed their faith and confidence in us. Your faith on us is our driving force.

At Bunts Sangha's S.M. Shetty High School and Junior College, teaching and learning happens in a nurturing and positive environment where each and every student is precious. The college has strength of 1854 students in the academic year 2020-21. As we reflect upon the past year, we are very proud of the achievements made by the Junior college. This report presents a panoramic view of the activities in the academic year 2020-21.

STAFF ACTIVITIES

The college has 28 committed teachers for the science and commerce stream. The college strongly believes that the all-round development of students will be possible only through empowerment of teachers. Various Webinars were organized for Teachers; 'Observe, Untangle and Transform (OUT)' on 15th May, 2020, "Decoding the 20 Lakh crores stimulus package" on 17th May, 2020, A webinar on "Income Tax 'Old and New scheme" on 19th May, 2020, 'E- Content Development Programme for teachers' on 27th May, 2020, Gender and Cybercrime, Relieving stress and calming your mind: Planetary Peace Meditation.

Induction Programme – Welcome 2020-21

Bunts Educational Institutions organized an induction programme "Welcome 2020-21" on 11st July, 2020. The intention of the programme was to orient, familiarize and internalize the Mission, the Vision and the Core-Values of Bunts Sangha's S.M. Shetty Group of Educational Institutions to the teachers. It was emphasized in the programme that the teachers must work as a cohesive team in making our Institution 'The

Institution' as envisaged in our motto 'Personality Development for Nation Building'.

Shri Harish Vasu Shetty, Secretary welcomed all the eminent guests, Principals, Vice Principals, teachers and non-teaching staffs. Shri B R Shetty, Vice Chairman addressed the concept of induction and our philosophy and expectations from the entire faculty members. Shri Nityanand Hegde, Vice Chairman addressed the academic expectations and financial expectations in the present time was highlighted by CA Harish Shetty treasurer of Powai Education Committee. Heads of all the concern section delivered the vibrant concept which is relevant in the present education systems. Vice Principal Ms. Pratibha Gadagalli also presented the concept "Opportunities to outshine" Junior college released e- Magazines "Insignia" in the induction programme along with other sections.

CA Shankar B Shetty addressed the audiences by ensuring the support and guidance required for the future endeavors of the institutions.

Since the Pandemic phase was new and challenging experience for the teachers, virtual training was given to the teachers to cope with the situation. Malla Reddy Institute of Engineering and Technology, Hyderabad organized webinar "Virtual Physics Labs" on 4th and 5th June, 2020 via Cisco WebEx. Which was attended by the Physics Teachers of Junior college section. Microsoft Team organized a Training on Microsoft Team on 12th June, 2020. 'Going Digital: The Future Ahead, Yoga for Healthy Body, Calm Mind Strong Spirit.

Challenges in Online Teaching with Special Reference to New Syllabus of Book-keeping & Accountancy.

N.G Archarya & D.K Marathe College of Arts, Science & Commerce organizes State Level Webinar on "Challenges in Online Teaching with Special Reference to New Syllabus of Book-keeping & Accountancy" on 26th September, 2020.

Maharashtra State Board of Secondary and Higher Secondary Education had conducted a workshop on New Evaluation System training for the Teachers.

All subject teachers attended this online workshop.

Bunts Sangha's S M Shetty Educational Institutions organized "Awareness Session on ISO 21001:2018" on 17th October, 2020.

ACADEMIC ACHIEVEMENTS

The HSC Board examination results show the academic progress of the Junior College. In the academic year 2019-20 we have achieved 99.63% result in science stream and 100% in the commerce stream. The total number of students who appeared in the Science stream - General and Bifocal were 271 out of which 21 achieved Distinction, 135 achieved First class, 112 achieved Second class and 2 achieved Pass class. The total number of students who appeared in the Commerce stream were 529 out of which 153 achieved Distinction, 278 achieved First class, 91 achieved Second class and 7 achieved Pass class.

CO-CURRICULAR ACTIVITIES & EXTRA CURRICULAR ACTIVITIES

In today's fiercely competitive scenario, being a book worm alone does not suffice. To help the students exhibit their multifarious talent, students are encouraged to participate in Intra College Competitions and Inter College Competitions. Many Online activities and competitions were conducted for the continual growth of our students.

"Traditional Day" was organized on 6th August, 2020

The students participated by uploading the traditional attire images in the Google forms.

Hindi Department of Junior College organized sketching and blog writing competition on 3rd September, 2020. The students actively participated in the sketching competition on the topic "Anekta me Ekta" and blog competition on the topic "Sangeeth aur Manoranjan".

Bunts Sangha's Educational Institutions celebrated Teachers Day on 5th September, 2020. The words of wisdom were shared by CA. Shankar B Shetty Chairman PEC; Shri B.R Shetty Vice Chairman PEC; Shri Nityanand Hegde and Shri Harish Vasu Shetty Secretary PEC and Shri Harish Shetty Treasurer PEC.

Virtual Singing Competition was organized on 9th September, 2020.

Mathematics Department of Junior College Section organized Video making competition on 10th September, 2020. The topic for video making competition "Life of a mathematician"

Hindi Department of Junior College celebrated "Virtual Hindi Diwas" on 14th September, 2020. And had also organized "Slogan Writing Competition" on 2nd October, 2020 on the occasion of Mahatma Gandhi Jayanti.

On the Occasion of 'World Students' Day in the honor of APJ Abdul Kalam and inaugural of Science and Information Technology Club on 15th October, 2020. Science Department of Junior College organized 'E-Certificate Designing Competition' on 3rd October, 2020. Fun with Science Experiments' on 7th October, 2020. 'Poster Making Competition' on 8th October, 2020. 'Elocution Competition' on 10th October, 2020.

Commerce Club of Junior College organized 'E- Essay Writing Competition' on 12th October, 2020. A Career Counselling Webinar was organized for Std XII students of science as well as commerce on 22nd March, 2021 and 23rd March, 2021.

Two days virtual Talent Hunt Event was organized on 9th April and 10th April, 2021 for Std. XI students. Singing, dancing, fine arts and literary arts events were conducted.

Students participated with great enthusiasm in various events to showcase their talents.

A webinar on Cyber Sakhi for girls of Std. XI was arranged on 14th April, 2021.

Intercollegiate Competitions:

Chandrabhan Sharma Junior College of Science and Commerce organized 'Intercollegiate English Essay Writing Competition' on 20th October, 2020. Junior College students participated in the competition and brought laurels to the college.

Bunts Sangha's Arathi Shashikiran Shetty Junior College organized an intercollegiate competition on 16th, 17th and 18th February, 2021. FYJC students participated with full enthusiasm in various events of the fest.

Many milestones have been achieved many still have to be reached. We at Bunts Sangha's S.M. Shetty High School and Junior College will continue our unceasing efforts to mould the young minds into well balanced personalities with a confidence and zeal befitting the standards of this portal of education. Thanks to the dedication, hard work, and leadership of our Board of Trustees, Principal, Vice Principal, Faculty, Non-Teaching Staff and Students for their continuous co-operation and support which has helped the college in achieving the best

“To accomplish great things we must not only act, but also dream; not only plan, but also believe.”

We at Bunts Sangha's S.M. Shetty High School and Junior College dream and believe in great success. We will continue to deliver on the vision and mission of providing a quality education to the students and maintain high standard

Students Corner

THE CRITICS :Destiny is Karma

Since the time, I was born I had been judged and my future had already been conceived by the people around. Also, the people living around started to criticize me as they get close to me, as an obedient child I will be respecting the elders and may allow them to show the negative side of me to the world by always pointing out my weaknesses for eg.: By body shaming me claiming statements like none will marry you, the child will always be dumb as he does not talk much.

Having a bunch of criticism pressed under my heart there comes a time where I now become a 'teen' now this is a dangerous word because here I develop a certain kind of maturity I went through hormonal changes and got to see the real side of the world which is the truth.

Here I tend to ignore the critics and distant myself from the places where I do not get respected as I deserve to be respected and my perceptions and opinions matter. Sometimes I fight for their respect but I am seen to be called as rude disrespectful and having an authoritative tone hence I just prefer to be isolated.

But due to all of these, I start to feel under confident and start doubting myself which affects me in deciding my future goals.

Recently it has been seen that maximum cases of depression and anxieties enrolled from the teens. They complain that they are being controlled feeling disturbed and no longer feel confident.

To conclude, I feel that here parents play a key role in affecting the child's mental health so even though the world criticizes them they will assure that their parents believe in them, also I believe that it's high time for the teens to lock up their horns and explore the fire burning inside them, channelize it and get to work and show the critics what you can dream, and make the dreams come true. In the end always take that critics as your motivators, get encouraged and zip their mouths forever by your success.

Be an encourager there is already lot of criticism in the world.

School – My Second Home

A person goes through various stages of life but school life is the best one. We spend 12 years of our life in school which practically makes it our second home. It is where our lively adventures actually begin. It is said that synonym of school life is friendship, which also plays an important part in our lives. During our school life we learn how to blindly trust our friends. At times, when our friends get caught we take blame on ourselves too. That's where you learn the true meaning of friendship. Every student is a part of a group in which they share their tiffin together, crack jokes and have lots of fun.

School is where we become the most creative by writing our names on every page of our general book in different styles and creating excuses like "I dropped tea on my book that is why I couldn't do my homework". Even the most boring jokes can be made hilarious in class. We try to find fun and entertainment in all the subtle things around us. 'P.T' period is the best part of school. We keep quite just as the teacher enters the class, so that she may take us to the ground. 'Computer Lab' is also known as 'Energy Lab' for some of us students as we go to the Lab to regain our energy and the moment we come out it's back to our sluggish self. Pranks which we pull out on each other get us into trouble most of times. The best part is when you get appointed as the class monitor or some council member and get badges during the Investiture ceremony that is a moment of pride. We make sure to cherish these unforgettable moments forever. The exam fever is the worst that is typically the only time when we

students put our minds, hearts, brains and our whole body to concentrate on what we are studying. The 'Open -Day' is when you come to know that your bad days have begun. My advice to you dear fellow friends is that no matter how much you hate or love your school, you will surely miss all of it once you leave. So enjoy your school days while you can.

BECAUSE I AM A WOMAN

Yes this is not a new topic to anyone. We all have heard about it before. Women's rights are human rights. Yet, millions of girls around the world are denied education, life-saving health services, and opportunities for a brighter future.

Just because I am a woman doesn't mean I can't voice my opinion.

Just because I am a woman doesn't mean I can't handle responsibilities.

Just because I am a woman doesn't mean I can't do anything by my own will.

Just because I am a woman doesn't mean I can't stand by my words.

Just because I am a woman doesn't mean I will not express my thoughts. Just because I am a woman will not stop until we start voicing our opinions, thoughts , ideas and feelings.

Why is it important to stand up for women's rights?

Women's Rights are Human Rights

It might seem like an obvious point, but we cannot have a free and equal society until everyone is free and equal. Until women enjoy the same rights as men, this inequality is everyone's problem. Protecting women's rights makes the world a better place

According to a few people, "gender equality and the empowerment of women and girls is not just a goal in itself, but a key to sustainable development, economic growth, and peace and security". While Research has shown this to be the case – society gets better for everyone when women's rights are upheld and taken seriously.

We're stronger when we work together

Although grassroots movements have done so much to effect change, when everyone comes together to support women's rights we can be so much stronger. By working alongside individual activists and campaigners on the 15 ground as well as running our own targeted campaigns, movements such as Amnesty International can form a formidable vanguard in the fight for women's rights.

Ever heard of Malala Yousafzai?

Malala Yousafzai is a Pakistani activist for female education and the youngest Nobel Prize laureate. She is known for human rights advocacy, especially the education of women and children in her native Swat Valley in Khyber Pakhtunkhwa, northwest Pakistan, where the local Pakistani Taliban had at times banned girls from attending school. Her advocacy has grown into an international movement, and according to former Pakistani Prime Minister Shahid Khaqan Abbasi, she has become "the most prominent citizen" of the country.

What inspires me about her?

1. Her unwavering commitment to improve the lives of girls globally through education
2. Malala's positive outlook inspires me not to give up, and to believe that everything is possible.
3. She is a fighter! Inspiring so many others to speak up and not be afraid!
4. If more women pick up the torch from the flame of courage that Malala has ignited they will rid the world of poverty and inequality!
5. Her unwavering beliefs and passion. She will stand for her cause until she cannot stand anymore and for that, I am inspired;
6. "Don't clip her wings" - she's a reminder that we can all make a difference by empowering and enabling others
7. We all have a voice. Malala used hers with dignity, purpose and sincerity. That is inspiring.
8. As a 16 year old girl, I'm inspired most by her courage to stand up for her beliefs even while her own life was at risk. Wow!
9. Malala is fierce and kind all at once. Her authenticity and sincerity combined with her tenacity and courage is what we need in our leaders.
10. Her courage. Malala shows us to speak up even if our voice shakes.
11. My dad has been incredibly inspired to be a dad as Malala's, for his strength to fight for his daughter's right to education.
12. When we lift up others we all rise higher - Malala is the brave saint that lives this truth and inspires millions to do the same.
13. Malala is inspiring because she is speaking up for the rights of those who have no voice. She bravely holds a lamp for girls to be educated.
14. Her steadfast commitment to her values even before she was recognised as a global sensation. When it was risky and without glamour.
15. You allow EVERY GIRL to see herself in you, regardless of age, socio economic status or race. You make us feel we ALL have the power.

16. Unlike most who are thrown a bad card in life, she's taken her card and used it to make a change; a significant, unparalleled change.

I hope from reading my article if you were someone who was scared to voice your opinion you will start overcoming it.

Malala's central message was that no matter what the obstacles — whether they be economic, cultural or social — everybody is entitled to a quality education as a human right. In the words of the young activist: “Education is Education”

No matter what , your age, caste, creed, race, colour, social status can't define you. YOU WILL GET WHAT YOU DESERVE.

Thank you :)

Kaali Peeli

It was a dreary day in the City of Dreams, fat raindrops pelted against the gravel roads. A deep breath in, and out. I stood dumbfounded in the Victoria Terminus, my entire life bundled in a tiny suitcase and a dusty duffle. A shove to the ribs and an angry “We have places to be!” bought me back to my senses. I gathered my belongings and scurried to the closest taxi stand.

“Uncle, Andheri?” a pair of wizened eyes from the kaali peeli crinkled and nodded back at me. With a sigh of relief and after thanking the lord for my sheer luck of being agreed to be driven in the first try, ushered myself into the warmth of the taxi. The rain was now portraying a new kind of rage; a rage that even the wipers of the vehicle couldn't keep up with. I leaned my head against the window and watched as the streets passed by in a plethora of colours and sounds.

Its magical how one city could have it all. While on one side of the street people sheltered themselves from the rain in the confines of posh gourmet restaurants while on the other, strangers shared umbrellas to huddle close to the street vendors to snack on their daily post- 9 to 5 *Vada pav* and piping hot cutting Tea. And I must admit, these street stalls were quite the hub for gossip. Stories of work, college, homes and other peoples' households as well, were being shared under the aureate glow of the incandescent bulb as the vendor or as everyone lovingly would call him, "bhaiya", would work wonders with the bubbling oil. The aroma of sputtering *tadka* and potatoes made my mouth water.

The kaali peeli took a left and must I tell you, this street was a whole other world! Temple bells chimed loudly as women adorned in silk saris and mogras fought with hawkers about how unfair the prices of tomatoes were while the hawkers retaliated with a tirade of excuses. The younger ones, however, were on their way back home from what I assume to be tuitions, their wet satchels were soon discarded and were replaced with bats and balls while they fought over who gets to be the batsman (I'll let you on a secret: it was the boy who bought the bat in the first place!).

The taxi was suddenly filled with the lulling notes of old Hindi ghazals. "Ma'am are you new here?" he questioned. I nodded. A quick knowing nod and he went back to his ghazals and I went back to this tiny, big world of mine and all of these strangers were somehow now a rather important part of my life. The rain had now slowed to a rhythmic drizzle and children were out and ready to splash in all the puddles the street had to offer.

"We've reached" I was jolted to my senses. I quickly evacuated the taxi and paid him. "All the best madam", he smiled and drove off until all I could see were faint traces of yellow and black under the dim streetlights.

It's been ten years since.

May be that's what this city does to you, right? It consumes you as a whole and all you're left to be is just another story. Today a million people were a part of my story, maybe tomorrow I'll be a part of someone's story as well.

GET READY TO COME BACK !

If you want to be a successful person you have to face a lot of setbacks and comebacks. Life is full of challenges. You always have to be prepared. In life, over-confidence never works. Luck does not exist in life. You get what you deserve. Good things happen to the one who is good towards others. In short, hard work pays off. All of us make mistakes. The person who has never made a mistake has

achieved nothing. You will feel bad about yourself and get discouraged, but beautiful things come from our failures. When we learn our failures. Just as the saying, "Rome wasn't built in a day."

When you think of giving up ask yourself, "Why did you start?" Go fetch those memories of how hard you worked to get where you are right now in order to achieve your dreams. People treated you like you were nothing but you still didn't give up and you kept on working. And now you have almost reached so far for your dreams. You can't give up now. Tell yourself, "It's not over yet."

The hardest thing in the world is to keep believing in yourself. It is inspired by all our fears, worries and doubts. So trust yourself.

Most people don't realize that they quit because of their circumstances, their temporary defeats and their failures. If you fail, congratulations! Most of the people don't even try. But still, there are a lot of people who started at the bottom. Now they are the best, living their dream life because they kept on working hard, even when it looked impossible. Behind every successful person there are a lot of unsuccessful years. You will see that opportunity will always make a way for someone who refuses to quit. It's true that you will experience tough moments, you will feel like giving up, but remember nothing can deny the person who won't be denied.

Giving up is only an option for those who don't want it bad enough. Ask yourself, "How bad do you want it?" Hard times will always come but one thing is for sure, no matter how hard it gets, how different it may seem, champions never quit. You have to say this to yourself. That's the champion's mindset.

One day you will look back and say, “I have made it” and that will be the proudest moment of your life.

All the best for your further life!

Youth icon Swami Vivekananda: Impact of an Indian monk on the world

Swami Vivekananda was not just an ordinary monk, he was also a man with deep scientific mindset. You won't believe that the legends like Nikola Tesla and Jamsetji Tata spoke about science to Swamiji. In our present time, when many people hear the word 'Swami', they immediately picturize a fraudster or scammer, who is out to dupe the people and has many cases against them. But, if there was a person who first said that “**Spirituality and Science are two sides of the same coin**” it was Swami Vivekananda.

Swami Vivekananda's practical approach have inspired many great inventors like Nikola Tesla. In his childhood, Swamiji didn't have any sort of interest in math or religion, but he was a disciple of science and spirituality. When he met his guru **Shri Ramkrishna Paramhansa**, he studied about India's ancient

Vedic secrets then he realized that the Vedas are filled with a massive amount of knowledge that should be spread worldwide for welfare of humankind. During last decade of 1890's, India's identify across the globe was just a British colony. Far from being a gold mine of knowledge, People thought that India is just a factory of slave production. But Swamiji wanted to change that and the parliament of religions happening in 1893 in **Chicago** was the best platform to initiate his work.

Swami Vivekananda was a marvellous combination of strong nationalism along with knowledge of Spirituality. When others were indulged in proving the supremacy of their religion, Swamiji used a novel approach, he said –“**As the different streams having their sources in different paths which men take through different paths which men take through different tendencies, various though they appear, crooked or straight, all lead to thee**”. When the world was debating on Darwin’s theory of evolution, racism and slavery were on it’s peak, saying our source and destination is the same on the global platform was nothing short than revolution. Due to these revolutionary thoughts, Swami Vivekananda became one of the most rational thinkers the world has ever seen. Many revolutionaries from the other fields became Swamiji’s friends.

Usually we have studied that Edison was the inventor of electricity but the truth is that he was an excellent businessman who was genius in acquiring and marketing patents but, Nikola Tesla was a superior inventor. Tesla’s technology was miles ahead away from that of Edison’s technology. Around 80% gadgets we use today works on the discoveries of Tesla. Proof from Nikola Tesla museum archives shows that a lot of his Tesla’s work was based on Vedic principles. In his book “**Man’s greatest achievement**” contains Sanskrit words like **Akash** (space) and **prana**(life force). Tesla learned about Sanskrit and the Vedas from Swamiji. Swamiji believed that all forces present around us are all part of a unified single force and gradually this spiritual sounding statement was proved by scientist using various equations. In 1985, A debate happened between Swamiji and Tesla. According to Swamiji, matter and

energy are the same, and Tesla started to work on this idea. Unfortunately, Tesla couldn’t accomplish his research but in the future, this was done by another great scientist Sir Albert Einstein and we got the most popular equation of the world $E=mc^2$. Tesla was inspired from the legendary weapon **Brahmastra** mentioned in *Mahabharata* and wanted to create a weapon like it. But after his death, what US government done with his research is still a mystery.

Not only Tesla, Swamiji have also met to Jamsetji Tata who introduced steel manufacturing in India. Swamiji stressed on the need of science, education and scientific temper in India based on it’s ancient ascetic spirit. Not only this, Father of American psychology-William James, German scientist- Hermann

Von Helmholtz and Father of 5G Indian scientist- JC Bose have considered Swami Vivekananda as their guide which happens because Swamiji believed in pursuit of truth whatever be the mode. He stated that- **Science is the search for truth in the external world and Spirituality is the search for truth in the internal world.** Swamiji have taught the knowledge of Vedas to the modern world, in the same way he taught about modern science to villages all over India with the help of his disciples. Due to this amazing balance, Swamiji is referred as a true youth icon even today also because he knew that the future world could not rely on the foundation of only modern science or ancient intelligence. Science and spirituality are not mean to contradict each other, but meant to complement each other

Stop Child Labour.

"The child is a soul with a being, a nature and capacities of its own, who must be helped to find them, to grow into their maturity, into a fullness of physical and vital energy and the utmost breadth, depth and height of its emotional, intellectual and spiritual being; otherwise there cannot be a healthy growth of the nation. "

The reason behind the prevalence of Child Labour in India is the leading cause of child Labour is extreme poverty in India. To supplement their parents' income or being the only wage earners in the family, children end up as Labourers in various industries.

We can stop child labour in India by spreading awareness, sending more children to school.

Discouraging people to employ children in homes, shops, factories, etc. Supporting NGOs like Save the Children. ...Child labour is a huge social obstacle that requires to be resolved on an instant basis with the help of both, people (particularly parents and teachers) and government. Children are very small however they lead a flourishing future of any developing country.

Father - The Real Life Avenger

For mother, her children are her life. But when a daughter is born, her greatest attachment is with her father. Father is a big blessing for every daughter.

When I was born some relatives called me unlucky, that time the one who replied to them that my daughter is big blessing of my life, is my father. My father, happiest part of my life. I couldn't eat without him. I used to sleep in his lap. He played with me like a kid. I walked by holding his finger. We laughed together, had lots of fun. I still remember when my father reached home, I used to run to the door and give him a big hug, that moment was the best part of my life. I had more attachment with my father as compared to mother.

But, one day I lost my father for forever. 31st July 2007, worst day of my life. He died. I was just 3 years old. I didn't knew what's happening. When I asked my mother, she said that, your father has gone to got a doll for you. But I get to knew in some days, now he will never come again. That

lap of peace, playing with dad, lots of fun with dad, called to my father as dad, everything was over. I realised that now I have to live without father. Really not easy thing. When my friends used to talk about their father that my father brought this for me, etc., then the one daughter without her father felt, all I'll say is that God should not show such a day to any daughter.

Father is the person who made me realise that I'm a princess, no guy in this world can love me as much as my father. Father's love for daughter is priceless. He's the one who loves even in anger. My mother is my heaven but my father is the peace of that heaven.

Life without father for a daughter is worst feeling ever. I don't understand what kind of situation I'm stuck in. I try to find support, I don't know what kind of punishment my heart is giving itself. If you put yourself in my place, you'll know what it feels like to be someone who lost her father in the beginning of her life in this world. Laughing eyes, smiling even in pain.

My mother is my heaven for whom I pray for good health, long life and happiness. She has always tried to be a father for her children. I wish, I pray, I want and I will try my best to give every happiness to my mother.

And today my dad is not here with me but whenever I'm in trouble and I call upon him I feel he is here with me. There is no end to a father and a daughter's love, it's always undying.

XII Commerce C

My personal experience of XI standard.

11th standard is over now and college is still closed, "It did not really take a great effort for me to change from class room based learning to a more remote situation since most of the literature for our courses come in the form of articles that are uploaded on our learning platform and the platform we are using for our lecture (zoom) was really easy to install and did not take long to figure out how it works overall.

The online lectures over Zoom have worked really well so far. I would have not expected this change to work out so smoothly from the students as well as from the teacher's side. Sometimes teachers provided videos

together with a PowerPoint presentation which is also a good way of teaching, although it is easier to get distracted since one can simply up to oneself when to actually take time to watch the lectures. I am excited to see how group work will be managed digitally since it's usually nice to meet our class members. However, I am confident that it will be fine since most of us are used to work with digital tools anyhow.

As a student, the remote style of studying requires you to be much more self-disciplined, especially when there is not even a Zoom meeting to attend. This can at times be quite difficult, but I believe it also teaches us to work more independently. Moreover, I too enjoy being able to structure my day as I like and to decide when I want to fit in my studies."

Teaching quality is also too good and all the teachers does all their works on time.

Teachers are really great with all their teaching styles and how politely they all talking and other things really appreciable.

And our class teacher 'Jessa Nellie mam' is also supported us all the time and other teachers also.

A Change in You

He's allowed to return home late at night,
She's shameless even if, she speaks during a fight.
He can walk out showing of his naked head and sin for her, lead her to
hell after she's dead.
He wants a wife who lives in a villa and that's okay.
And there she's forced to wed even if he's living in an alley.

So now where's the humanity?
Where's the equality?
But still they chant "RESPECT WOMEN"!!
Rallying around the whole city.
Thinking that they're doing best duty..
Unaware that it's not true. We need the
change, yes we do... But not in the world first in
YOU.

A WALK INTO THE WOODS

Was passing by the woods
It was so soothing in there, so many things to talk
on,
And a voice came from nowhere!!
Shall it be those trees, grasses; who cares?
I sat on the bench to think about it..
And felt my cheeks being air kissed
Trees started showering leaves,
And even the grasses bowed o'er me, Got
startled by this scenery.
And that voice again whispered
"WE just need love we're unaware of hate"
"WE don't want to disappear coz we fear"
And that's all! ! just don't ignore it..
Just don't say you don't care,
There's no more time to think
Or we'll soon be destroyed in just a blink... JSST A BLINKK...

Shakeela.S
XI Science B

SHE THE WOMEN

She's a girl she's a women...
She's no weak, nor fragile,
Looking pale is just her style.
She suffers a lot but still she smile.
If she doesn't speak, doesn't mean she can't
But still she's mute every time you taunt.
BUT stop just stop!!
She came a long way sacrificing,
She's yours if you respect her feelings.
So treat her what she was lifelong praying...

BEHOLDEN

It doesn't matter if your wallet is full or empty,
Doesn't matter if you have thousands or some changes in penny.
Because every coin is sign of hard work
Shouldn't feel shy to show them in front of others.
Because notes n coins are both equal lovers...
So we want to wear from BELANCIAGA?
And dream to shop at GUCCI OR PRADA?
It's funny how we blamed our parent
For not buying everything we wanted
Though they do everything to make us happy..
We still end up making them feel clumsy.
Say what not when we get no iPhone to choose and feel envious when
other's use.
EVER seen how grateful we are!!
Consuming three times, having a roof, and riding through car.
Yet attiring devoid holes or scar.(Bonous)
Try earning yourself...then see... yaa!
Be fair were you able to buy atleast NOKIA?

Anonymous storm

So now... these fearful heart,
Crossing over miles and miles forcing the
darkness to let us all seems to be awaited for
his call.

Waiting the glooms day to fall . .

The storm being a vandal

Gulping thousands of shelters, Shredding
innocence and towers finally groans with
showers... To see if its victory's done.

Looking to its hooligan

They insisted the prayers

Started chanting their own...

For dazed! Atheist hailed on for too long.

•Maybe the sound went up too far and travelled the heart off almighty
one, Thunderstorm then came like a fern.

Wanna know next..?

Let's wait for our turn. .!!!

TWINKLING STARS

The sun goes down,
The moon comes up
The world becomes dark,
The sparks you see are the twinkling stars.

High in the sky, Bright as
white,
In the bliss of solitude,
The sparks you see are the twinkling stars.

Bigger than the sun, Brighter
then it appears, Beautiful than it
looks,
The sparks you see are the twinkling stars.

??

FREE BIRD

What is it?
Flies up so high, Likes it
owns the sky,
Making it's own kingdom, And
enjoying it's freedom,
Spreading it's wings in the breeze, I know
what it is,
It's the free bird which owns the sky.

COLLEGE DAYS

Well, I still remember first of my college,
I was quite nervous but I still had the courage.

College was so huge,
I was confused which route should I choose.

Than I met so many new teachers,
And can never measure their love with
centimetres.

My college had so many fest,
I did participate and gave my best.

Things changes with time, time changes things,
That's what they all say and that's how the trouble begins.

And then everything started online,
But teachers never gave up, they tried their best to keep things has it was offline.

Even if the things got serious,
We all had new experience.

Yes, it's sad we haven't completely enjoyed our college life,
But definitely our mind was a thousand times more alive.

I'm grateful for all the lessons learned,
And ready to fly like a bird.

The years may have flown but the memory stays,
I'm gonna miss my beautiful college days.

Doom.

Be it night or be it day
staying there forever,
not known not seen but may
it be felt wherever.

So lonely and ever so deafening
engulfed in the gloom,
comes a new beginning
In a form of loop.

The end, the dark, the winter is all you
filling the heart full of room,
making us wait for the new
turning everything to doom.

Awaken at the time of dreadness
to make us show our humanity,
The Doom bestows us with darkness

By order of God to restore our sanity.

Today the birds seem to be chirping louder, flying higher.

Street dogs barking happily and all thinking "Where are all the notorious humans hiding?" planning something for us to get more destroyed?

All the creatures of nature enjoying and thinking that they've succeeded... Yes. We humans are destroying each and everything steadily, this is Karma.

Not only us but nature also has the power of KARMA.

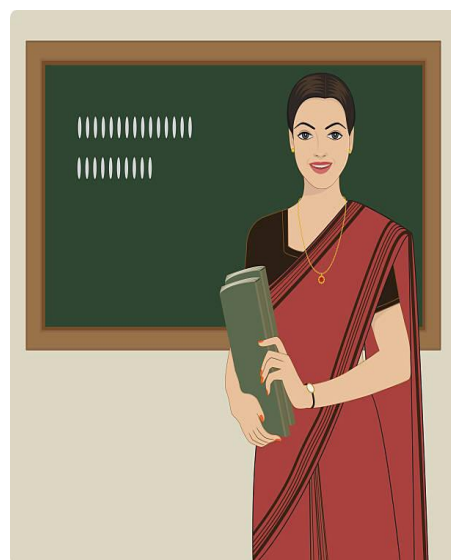

Even now some people aren't serious. But yes they'll pay for it.

Gandhiji said. "Nature is here to provide everyone's need but not everyone's greed" Remember this and think about it.

किसी गिरते को उठाए

किसी गिरते को उठाए , तो कोई बात बने ,
किसी रोते को हँसाये तो कोई बात बने ,
प्यार अपनो से तो , हर कोई निभा लेता है ।
प्यार गैरों से निभाए तो कोई बात बने ।
और इश्क इबादत हो जीवन में तो ये जीवन खुशहाल बने ,
किसी गिरते को उठाए।।।।।।

कांटे राहों में बिछाना , तो ये बड़ी बात नहीं
फूल राहों में बिछाए तो कोई बात बने
और मैं जीवन से निअक्ल जाए तो कोई बात बने ,
किसी गिरते को उठाए।।।।।।।।।।

दुनियाई खुशियों में तो , हो जाती है पूरी दुनिया शामिल
काश , कोई काम दुःख दर्द में आये तो कोई बात बने
और मानव हो मानव को प्यार करे तो कोई बात बने
किसी गिरते को उठाए

हिन्दू मुस्लिम सिक्ख ईसाई ये तो धर्म के ताने बाने हैं
हम सब का तो एक ही धर्म है, प्यार मिलन भाईचारा ये अगर कोई निभा ले
तो कोई बात बने
किसी गिरते को उठाए

ए मेरे मन की बात है ,
राम अल्लाह को रिझाना है मुबारक लेकिन

को रिझाये तो कोई बात बजे
और मानव को मानव हो प्यारा एक दूजे का बने सहारा तो बोई
किसी गिरते को उठाए

आज मैं आपको एक कहानी सुनाना चाहता हूँ । इस कहानी में एक पिता अपनी पुत्री के साथ बारिश में भीग रहा था । पिता बारिश से बचने के लिए सर पर हाथ रखे थे और बच्ची बारिश की बूंदों से खेल रही थी । दोनों एक दुकान के नीचे जा कर खड़े हो गए परन्तु बेटी दुकान की छत से टपकने वाली बारिश की बूंदों को हाथ आगे करके उस पानी को कभी पी रही थी तो कभी उड़ा रही थी ।

उस बच्ची ने अपने पापा से पूछा पापा ये बारिश रोज रोज क्यों नहीं आती , पापा मोबाइल पर व्यस्त थे इसलिए बच्ची की बातों पर ध्यान नहीं दिए और बोले बस ऐसे ही नहीं आती । बच्ची की उत्सुकता बढ़ने लगी और उसने फिर वही सवाल दोहराया परन्तु इस बार पापा से कोई जवाब नहीं मिला ।

आखिरकार बच्ची इस कहानी में क्या करने की कोशिश कर रही थी ? वास्तव में वो अपने पापा का ध्यान मोबाइल से हटाकर अपनी तरफ आकर्षित कर रही थी । आजकल माता-पिता बच्चों के सवालों को नजरअंदाज कर देते हैं कारन की वे मोबाइल की दुनिया में इतने व्यस्त हो गए हैं की उन्हें सही गलत का ध्यान ही नहीं रहता । वहीं जब बच्चे मोबाइल पे व्यस्त रहने लगते हैं तो उन्हें डाटते है । पर सच तो यह है की बच्चे जो देखते हैं वही सीखते हैं । बच्चे तो कोरे कागज़ के सामान होते हैं जिस पर जो लिख दिया जाये वही अंकित हो जाता है । बच्चों को किसी भी बात के लिए दोष देने से पहले बड़ों को ये सोचना चाहिए की हम उनके सामने अपनी कैसी छवि प्रस्तुत कर रहे हैं ।

Teacher's Corner

Know Yourself – It's What You Make of it.

Street Smart!!!

He came to Mumbai like millions of others, in search of a better future. Inspired by Mcdonald's, Prem Ganapathy has risen from humble dishwasher to owner of the feast food chain 'Dosa Plaza', with more than 26 outlets across India.

He didn't go to a B- school to learn all this. He found knowledge, outside of college, on the hot and dusty streets of Mumbai.

Starting his career as a dishwasher, from a tea stall to roadside dosawallah, to running a small food joint near Vashi railway station – that would have been an achievement for most people. Prem Ganapathy went on to open a counter at New Bombay's first mall – Centre One – and has not looked back since.

Today there are more than 26 'Dosa Plaza' outlets all over India as well as a franchise in New Zealand.

It has not been easy but it is possible. Prem Ganapathy's story gives us a hope, that yes, anyone can achieve anything in our country.

Far From the Crowd!!!

He was a city boy who knew he wanted to work on a farm. Right after his college, Sunil went to Belgium, where he learnt about making cheese. That's what he's been doing at Flanders Dairy for the last three centuries. Sunil is an average guy in every sense of word. Except that unlike an usual average guy, he knew himself. He enjoyed working in his farms, milking cows and making cheese. When you know what you want, no one can really stop you.

Sunil wakes up each day, excited about making his next ball of cheese. Excited about working with his hands, creating something new.

And I think, life is a kind of like milking a cow! You can make it as a delicious stretchy – stringy cheese out of it, or simply let it curdle and go sour.

Facts to Young Generation

From the above two stories I can conclude the following points as;

Income minus expenditure = profit. Its one simple line never to forget.

You have to know what you are doing ; if not, join hands with someone who does.

You have to have a fire, I don't accept defeat.

If you are into the food business, remember the main thing is hygiene, which can never be compromised.

Never get complacent. Never let down your guard, never compromise.
You need to have a passion – more than any qualification.
You need to find out what you love – and make it happen.

Finally, you must 'Think Different'. This applies to every field, whether its music or art or literature. If your style is completely different either you fall miserably or you take it to a completely different level, because, people love it.

But that's the only way to succeed. To stand out.

DIFFERENT

Crypto currency in India: Everything You Need to Know!

In the early stages of the human, there was a barter system of exchange which later on diminished due to its inherent flaws in it, and from then many types of research has been made to make Digital money and slowly the paper and coin currency have been introduced and got popular all around the world.

Today in the modern economy, we have real money in paper and coins form and also the Digital money in the form of electronic wallets, debit and credit cards, etc. which are controlled by central or common authorities.

Cryptography is a similar concept for digital currency but in a decentralized manner i.e., no servers involved for processing transactions and no central authority to govern.

What is Crypto currency?

Crypto currency is a digital kind of currency that is used in trading and transactions. It is just like paper currency, only that it is not physical. A fun fact is that a crypto currency is a decentralized form of money, meaning it is not and cannot be regulated by any government or group of governments.

It mainly works on the principles of cryptography (a method of protecting information and communications through the use of codes so that only those for whom the information is intended can read and process it.) The prefix '**crypt**' means 'hidden' or 'vault' and the suffix '**graphy**' stands for 'writing.'

It is believed that it is impossible to involve in the duplication of the transactions or involve counterfeit currency in this mechanism. Many crypto currencies are decentralized networks based on block chain technology; it is a list of records that are growing all the time. They are known as blocks that link and secure each type of crypto currency. Then there is a single network called mining, in which all the funds are kept. In other words, a process by which the crypto currency is validated is called mining. Some of the popular crypto currencies are Bit coin, Lit coin, Ethereum, Z-cash.

How Crypto currency is purchased?

So, the answer is that in order to purchase a crypto currency, you must open a digital wallet. This is the place where you can use your currency and can purchase or sell goods or services.

So, whenever the term crypto currency is used, Bit coin comes hand in hand. The original and first form of crypto currency was called Bit coins, after which other forms like; Ethereum, Litecoin, Dark coin, dash, and the likes were brought on stream.

Bit coin hit the market first in 2009 and has been flooding the business world ever since. The drastic rise in bit coin was so much that its value went from \$1000 to over \$19,000 in 2017 alone. This is the first and most popular of all forms of crypto currency.

Ethereum is another form of crypto currency that kick-started in 2015. Its uniqueness is that it allows for smart contracts and DApps usage without any glitch or scam. Not to omit that it regulates interaction from third parties, and it does not give downtime.

Litecoin, another form of crypto currency, started in 2011 and rose to be the silver to bit coin's gold. This is because it is very similar to bit coin, only that it has a faster transaction rate.

Why are crypto currencies so popular in India?

The demand and popularity for crypto currencies have grown steadily In India and here are some of the reasons why crypto currencies are so popular:

1. No Human Involvement

Crypto currencies are great and most preferable for online international transactions without any glitch whatsoever. Since it is a digital currency that is decentralized, there wouldn't be any need to go through any government body when participating in any international financial transaction.

It fosters any business interaction without the interference of any government body, which has been one of the issues some businesses face when they go international.

With crypto currency, all of the worries of being denied access to some funding due to government regulations do not apply. This has made it a kind of currency to be reckoned with all over the world.

2. Ease of use and transparency

In the monetary markets, crypto currency has identical dynamics as equities. Since the costs of crypto currencies are also being traded within the market, there may be a possibility for humans to make investments

and have interaction in arbitrage as they make use of block chain technology. This is because it gives better returns compared to different investments, making a lot of people tap into the advantages of crypto.

Its usefulness has birthed different start-ups and has made different companies to develop software programs for the block chain for use in this digital age. This has delivered and encouraged recognition and acceptance of crypto in the digital society.

3. Secured transaction

Many professionals identify crypto currencies and the block chain as truly unhackable. Since crypto currency runs on what we call the block chain, one of the majorly acknowledged blessings of crypto currency is the prevention of fee scam, as data is available to everyone, encouraging transparency.

With a shared ledger, it fosters immunity to any sort of tampering; all data shared is accurate and updated each second. This reduces any possibility to duplicate fraud. Furthermore, as soon as affirmation is finished on a crypto currency transfer, the transaction may not be reversed, unlike credit cards wherein there are hacks attached.

This is a safety measure in opposition to fraud, which shows that there is proper management of transactions without any third-party interference and manipulation. Not to omit that, it does protect the identity of the person making the transaction, which further justifies the fact that it is unhackable.

4. Speed of transaction

Crypto currency has been verified to be a very fast means of transaction, as fast as light. It can also do multiple transactions at a time without any mix-up whatsoever. For this reason, people have adopted this method of transaction, as it makes the business move as quickly as possible.

The rise in acceptance of crypto currency has been ground-breaking, and it keeps soaring as the best means of transaction in this digital age. This has given rise to conclusions that it is the future of currency, which is currently growing, and will most likely be so. However, there have been different debates about the rules and criteria governing the operations of this "unique" kind of currency.

Crypto exchange

Crypto exchange was reported to have grown over 10 times as it used to be giving a 47% growth for Q1 2020. More so, the United States-based crypto market exchange liaised with that of India, giving access to crypto-to-crypto conversion and trading services from April. A lot of investors found safety in digital currency as traditional assets declined due to the coronavirus pandemic.

Regardless of all of this growth, in June 2020, the government reconsidered banning crypto currencies based on a report that was moved by the finance ministry for inter-ministerial consultation. However, the crypto exchange executives reverted that crypto currencies can be regulated as commodities, and the nation will suffer rivals from business, traders, and enthusiasts based on their constitutional rights.

Conclusion

The continuous rise in the usage of crypto currency has sparked different debates not just in India, but all over the world. The whole world is clearly divided when it comes to crypto currency; there are few famous personalities like Bill Gates, Al Gore (a Nobel Prize winner), and Richard Branson who support the crypto currency in increasing the store value of money.

On the other side, we have people like Warren Buffett, Paul Krugman, Richard Shiller, who are completely against it; they call it a Ponzi scheme and means for criminal activities.

In the future, there is going to be a conflict between regulation and anonymity since several cryptocurrencies have been linked with terrorist attacks, government would want to regulate how cryptocurrencies work; on the other hand, the main emphasis of cryptocurrency is to ensure that their users are kept anonymous.

Futurists believe that by 2030, cryptocurrencies would occupy 25% of national currencies, which means that a significant chunk of the world would start believing in crypto currencies as a mode of transaction. It's going to be increasingly accepted by merchants and customers, and it will continue to have a volatile nature, which means prices will continue to fluctuate as they have been for the last few years.

संस्था हमारी

ज्ञान ज्योति प्रदायनी यह संस्था
छात्र - छात्राओं में ऊर्जा भरने वाली
नई डगर नई राह दिखाने वाली
बच्चों के सपनों को साकार करने वाली।
संस्था हमारी

शिक्षा के द्वार सबके लिए खुले हैं
सब मिल - जुल कर पढ़ते - लिखते
साथ - साथ सब आगे बढ़ते हैं
सबके जीवन में रंग भरने वाली।
संस्था हमारी

जीवन मूल्यों से परिपूर्ण हमारी संस्था
विधार्थियों का सम्पूर्ण विकास लक्ष्य हमारा

हम निरंतर भरते बच्चों में
योग्य आचरण ,शालीनता
उदारता ,त्याग, क्षमा, सहनशीलता
इन गुणों को विधार्थियों में हम बोते
जिससे सवरता हमारा हिंदुस्तान ॥

सफलता की पहचान

अपने हौसलों के बल पर हम
अपनी प्रतिभा दिखा देंगे ।
भले हमें कोई जाने न जाने
हम अपनी पहचान बना लेंगे ॥

सफलता हर व्यक्ति को अच्छी लगती है । यह सफलता है क्या इसकी परिभाषा क्या है क्यों लोग जीवन में सफल होना चाहते हैं यही सारे प्रश्न मेरे मन में आते रहते हैं और फिर मैं सोचती हूँ की सफलता और असफलता में फर्क क्या है कौन जीवन में सफल है और कौन असफल है। तभी मुझे स्वामी विवेकानंद जी द्वारा कहे कथन स्मरण हो जाते हैं कि व्यक्ति कि सफलता और असफलता व्यक्ति स्वयं ही निर्धारित करता है जिसे अपने ऊपर पूर्ण विश्वास होता है वह जीवन में सफलता प्राप्त करता है और जिसे अपने ऊपर विश्वास नहीं होता है वो असफलता का मुख देखता है।

जीवन में जिसने भी सफलता की उचाईयों पर कदम रखा है वह तुरंत ही सफल नहीं हो गया बल्कि उसने अपने जीवन में बहुत ही ज्यादा संघर्ष किया तब जाकर उसने सफलता पाई है। जीवन में चारों तरफ परीक्षाएँ हैं इन परीक्षाओं को पार करना है इन परीक्षाओं को पार करते समय अनेक बाधाओं का सामना करना है जो हसंते हुए इन बाधाओं को पार कर जाता

है वह जीवन मे सफलता के सोपान पर पहुंच जाता है तो आप स्वयम विचार कर के देखिये
कि क्या आप सफल है या असफल ॥
