

Curriculum

XSEED Education Curriculum is designed to help students learn the skills they need to succeed in the 21st century. We focus on critical thinking, problem-solving, communication, collaboration and creativity. Our goal is to prepare students for a rapidly changing world.

We follow the XSEED curriculum, a proven and research-based academic program for school that builds thinking skills & problem-solving confidence in children. In the class, we follow a 5 step methodology which is AIM, ACTION, ANALYSIS, APPLICATION and ASSESSMENT.

XSEED replaces a knowledge-transmission or "teaching as telling" approach with an inquiry-based, constructivist approach that uses hands-on activities, followed by reflection and feedback. It also emphasizes rigor through practice and assessments.

The XSEED education program is a paradigm shift in the teaching learning-process where there is no scope for rote learning.
